

Tubecon Laser

Tubecon laser specialises in the laser cutting of base plates. The perfect balance between high quality products, fast delivery times and good prices is what we aim to offer our customers. If you are looking for a reliable, quick and flexible supplier we are exactly what you need as the balance we offer is the one you require.

Situated in Rosslyn, Pretoria we not only offer our laser cutting services to the Gauteng area but also to Durban, Bloemfontein, and Cape Town and throughout the rest of South Africa.

Products:

We can cut various material plates of up to 6 x 2 meter lengths with thickness ranging from 1 to 25mm with ease. As the quality of laser cut products are higher than those of plasma cutting and do not need extra tooling our customers will be able to receive their sheet metal components within an exceptionally short lead-time. We pride ourselves for the fact that we are known in the market for our astonishingly fast lead-time.

The following are only a small list of the endless products which we can cut:

- Flanges
- Washers
- Base Plates
- Mining supplies
- Display for advertising
- Custom displays

Materials:

Any product can be cut out of various sheet metals including, but not limited to:

- Stainless Steel
- Mild Steel
- Aluminium
- Bennox
- Hardox

Equivalent and other materials are not an issue for us.

Talk to us. We've got it!

Tubecon Laser

RFQ's:

Tubecon Laser believes in not only providing customers with high quality profile cutting, but we also aim to supply quotes within a relatively short time.

For any enquiries, please contact our more than capable sales team and send through drawings of all your laser cut products. In order to ensure that you receive your quote in the shortest possible time, please send us a quote request with the following:

A DXF containing:

- A part name
- Plate thickness
- Material Type
- All dimensions needed.

Please note that prices are subject to quantities.

Deliveries:

Based in Rosslyn, Pretoria next day deliveries, from end of production, are possible to customers in the Gauteng region. With our trucks running to Durban, Bloemfontein and our branch in Cape Town more than 2 to 3 time a week we can supply our laser cut parts to customers across Southern Africa.
